RoHS/WEEE Status: 30 June 2006

Dear Sir,

The UK Department of Trade and Industry has advised us that our range of products fall under RoHS/WEEE Category 9 *Monitoring and Control Instruments*.

2002/96/EC WEEE Directive Annex 1B - Category 9:

Smoke detector
Heating regulators
Thermostats
Measuring, weighing or adjusting appliances for household or as laboratory equipment
Other monitoring and control instruments used in industrial installations (e.g. in control panels)

Accordingly Pyronix products are outside the scope of the RoHS Directive.

This means that our products are therefore not subject to the RoHS Directive and its implementation date of 1 July 2006 because only Categories 1-7 & 10 of the RoHS/WEEE Directive apply.

As this is a European law we have also *confirmed* through the DTI and its contacts with the EU Commission that this non-inclusion is correct for all member states of the EU.

In preparation for the potential future inclusion of category 8 & 9 products into the RoHS Directive it is our intention that all Pyronix Products will be compliant by 01 January 2007.
