INITIAL SET UP PYRONIXCLOUD LOG IN AND ENFORCER CONNECTION

STEP 1

Download HomeControlHUB to a compatible tablet. Please check the Google Play Store for a list of compatible devices.

• Select the 'continue' button.

STEP 2

HomeControlHUB now needs to be connected to the **End User's** PyronixCloud account.

- Enter your PyronixCloud email address and password.
- Read and accept the T&Cs
- Click 'Sign In'.

STEP 3

HomeControlHUB will request access to the devices location. This will allow it to search for the control panel.

• Select 'allow'.

STEP 4

HomeControlHUB now needs to be connected to the Enforcer.

• Select 'Set Up an Alarm System Control Panel'.

STEP 5

HomeControlHUB needs one final security check before connecting to the panel.

- Enter the app password.
- Select 'continue'.

HIK-CONNECT OR PROCONTROL+ LOG IN

Visual surveillance products can be linked through a Hik-Connect account which supports both the ProControl+ and Hik-Connect apps.

To add new or existing Hik-Connect cameras, tap the camera tab on the left side of the main screen.

STEP 2

Select 'Link to Hik-Connect' to be transferred to a webpage to \log into or create a Hik-Connect account.

STEP 3

Enter the email address or phone number and the password of the existing Hik-Connect account. Select 'Authorized Login By Hik-Connect' (E.g. 4407798123456)

REGISTER

6

STEP 1

If you do not have an account, scroll to the bottom and select 'Register Hik-Connect' to create one.

STEP 4

Any cameras that have been added to this account will now appear on the cameras home screen.

Please note: Cameras with encrypted video streams require entry of a verification code set in the camera when installed.

STEP 5

Tap the quick action category to reveal the available actions.

STEP 6

Select the action to link to the slot and tap 'Save Changes'.

QUICK ACTION SLOT OPTIONS Smart devices

Smart devices such as SmartPlugs that have been learnt to HomeControlHUB. Unless configured in a scene or automation, these are generally toggled on and off. See 'Smart Devices' on page 16 for more information.

Scenes

Scenes are a sequence of events that are manually triggered by the user. They can include a single or multiple smart devices and delays between the actions of the smart devices if necessary. See 'Scenes' on page 18 for more information.

Installer defined

Simple sets that are switched on in the panel.

Outputs

Pre-programmed actions of the security system intended to instruct another device to operate. Typically these are physical outputs that are connected to an ancillary device such as a light, a set of lights or an electric gate.

Change Quick Action slot 1

CAMERAS ENCRYPTION AUTHORISATION

If the camera on the Hik-Connect or ProControl has an encrypted video stream, it requires entry of a verification code configured in the camera when installed.

The verification code was created when installing the

camera. This needs entering here and tap 'Decrypt'.

A camera requiring a verification code will appear blank with a red padlock. Tap the red padlock to enter the verification code.

OFFLINE DEVICES

If there is an issue with a camera stream, HomeControlHUB will display that the 'Device is offline'. If this message is displayed, the first things to check/try are:

- The camera and the network router has power
- Re-connecting the camera to the Wi-Fi
- Check if settings have changing the wireless network and the router

REORDERING CAMERAS (DRAG AND DROP)

Press and hold on the stream that is to be moved until the blue camera icon appears.

Drag the stream to the position the new position and then release.

CAMERA FULL SCREEN OVERVIEW

Please note: The below functions may differ or not be accessible depending the camera capabilities.

Mute Stream quality

Press to toggle between audio and mute .

Switches the stream quality from high definition (HD) to standard definition (SD) and back .

Zoom Move the slider up to zoom in and down to zoom back out.

Pan

Once zoomed in, the screen can be panned by swiping.

Tap the arrows to rotate/pan the camera in that direction.

Record feed

Tap to start recording video of the live stream. Tap again to stop recording. This will then be saved to the tablet.

Take screenshot Tap to take a still image of the

current view. This will then be saved to the tablet.

SMART HOMES SMART DEVICES

STEP 1

Tap the Smart Home tab on the left side of the main screen.

STEP 2

Tap 'Add New Smart Device'.

STEP 3

Following the on-display instructions, place the smart device in 'Discovery Mode' and press 'Continue'.

STEP 4

Enter the Wi-Fi credentials of the network HomeControlHUB will now scan for that the smart device is to connect to and smart devices in 'Discovery Mode'. press 'Confirm'.

STEP 5

STEP 6

Once the device in 'Discovery Mode', has been found, HomeControlHUB will install it.

STEP 7

16

The smart device can now be given a name so it is easier to identify.

STEP 8 Tap 'Done'.

STEP 9

The device appears under the 'Smart Devices' column and can be toggled on or off by tapping the device name.

SCENES

Program a scene to initiate a series of tasks when triggered by the user, for example, switching the living room lamp on and the fan off simultaneously, or even with a delay between the two smart devices. Once initiated, it will progress until it has completed the full sequence.

STEP 1

Tap the Smart Home tab on the left side Tap 'Create New Scene'. of the main screen.

DELAY

18

To configure a delay, select 'Select delay' and enter the time delay period using the drop down boxes.

STEP 6

STEP 2

Repeat steps 3, 4 and 5 to add more tasks to the sequence.

STEP 3

Configure the first task of the sequence, it can be a device action or a delay.

																		10	♥ E 8
