

Wireless LCD

Advanced functionality. Everyday usability. Enhanced user experience.

The Wireless LCD offers a professional interface that's as simple to install as it is to use.

Designed to support both day-to-day management and full system programming, the keypad provides a clean, wire-free solution that minimises disruption and maximises control.

Whether for homes or businesses, it's the perfect choice for customers who expect seamless, stylish and secure protection.

With a crisp and clear display screen, real-time system updates, responsive keys and easy-to-navigate menus, the Wireless LCD strikes the ideal balance between advanced functionality and everyday usability, for an enhanced user experience.

FULL COMPATIBILITY

The Wireless LCD pairs quickly and securely with Pyronix panels, including the Enforcer V11 and EURO 76 (with wireless ZEM). Its wireless design allows for installation wherever it suits the space; no cables, no mess.

SIMPLE SET UP

The Wireless LCD is quick and easy to set up, with no wires and minimal disruption, making it perfect for upgrades or new installs. With easy pairing and a strong wireless signal, it's a fast-fit solution that delivers full control in minutes.

COMPLETE SYSTEM CONTROL

The keypad can be used to check system status, arm/disarm, manage settings, and even program the entire system. The backlit LCD also ensures easy operation even in low light.

BOOST EFFICIENCY, ADD VALUE

The keypad integrates easily across multiple Pyronix panels, making it a versatile and attractive addition. Its simple installation and system-wide compatibility make it an ideal upgrade.

CLEAR, BRIGHT LCD SCREEN

Unlike basic LED keypads that rely on simple lights to indicate system status, the Wireless LCD provides a clear, full-text display that shows exactly what's happening.

MORE THAN A KEYPAD

Adding the Wireless LCD to your installs sets you apart. It's not just a keypad; it's a full control and programming solution that enhances your offering without increasing installation time. From a single control point, customers get clarity and convenience, while you benefit from both greater productivity and customer satisfaction.

RELIABLE MAINTENANCE

With the same trusted batteries used across the Pyronix wireless range, stock management becomes simpler, and maintenance more predictable, helping you increase value and reduce costs to maintain healthy margins, without adding complexity.

PARTCODE**LCDRKP-WE****PHYSICAL**

Dimensions (W x H x D)	160 x 125 x 36mm
Weight	375g
Casing	3mm ABS
Colour	White
LED indication	Amber, red and green
Tamper switches	Front and rear

ELECTRICAL

Transmission method	Fully Encrypted Rolling Code
Transmission frequency	868Mhz FM Transceiver Narrow Band
Transmission range	~300m in free space
Battery type	4 x 3.0V CR123A
Low battery threshold	2.4V +/- 5% @ 25°C
Battery life	2 years

ENVIRONMENTAL

Storage temperature	-10°C to 40°C
Operating temperature	-10°C to 40°C

CERTIFICATIONS

Security grade	II
